

IMPORTANT:

TO SCHEDULE
a staff-led program, you must speak to a member of the Blue Jay staff!

1. We require each instructor to incorporate at least **six environmental programs/activities per night** in their overnight agendas. This means that if a group spends **two nights**, they must incorporate **12 programs/activities**.
2. The educational staff at Blue Jay Point will be happy to help you in planning your overnight agenda so that your group may take the best advantage of your learning opportunity.
3. Suggestions for change and improvement of agenda items may be made to groups whose agendas do not show an adequate amount of environmental education activities, whose activities are not seasonally appropriate, or whose agenda shows timing difficulties.
