

# Contents

## Section 1 - Introduction

1.1 Purpose of Study .....	1-1
1.2 Project Background .....	1-1
1.3 Process.....	1-2
1.4 Acknowledgements .....	1-3

## Section 2 – Summary of Existing Conditions

2.1 Service Area Characteristics.....	2-1
2.2 Regulatory Considerations.....	2-1
2.3 Summary of Current Stormwater Program Activities.....	2-5
2.4 Level of Service Evaluations.....	2-7
2.5 Existing and Projected Stormwater Management Program Expenditures .....	2-8
2.6 Conclusions From First Phase of Study.....	2-10

## Section 3 – Stormwater Task Force Process

3.1 Supporting Data.....	3-1
3.2 Identification of Issues and Concerns.....	3-3
3.3 Development of Objectives .....	3-4
3.4 Alternative Tools Evaluation.....	3-4

## Section 4 – Recommendations

4.1 Initiate Hydrologic and Hydraulic (H&H) Modeling of the Stormwater System .....	4-1
4.2 Implement Post-Construction Stormwater Runoff Controls .....	4-3
4.3 Enhance Sediment and Erosion Control Programs .....	4-5
4.4 Implement County-Wide Stormwater Call Center.....	4-6
4.5 Risk-Based Approach to Stormwater Maintenance .....	4-8
4.6 Collaboration with County on NPDES Phase II Minimum Measures.....	4-9
4.7 Environmental Monitoring.....	4-10
4.8 Collaboration on Public Education Programs .....	4-12
4.9 Maintenance and Inspection of On-Site Wastewater Systems .....	4-13
4.10 Summary of Voting Results and Priorities .....	4-14

## Section 5 – Implementation Plan and Cost Evaluation

5.1 Recommended Steps and Cost .....	5-1
5.2 Implementation Schedule .....	5-6
5.3 Summary of Implementation Costs.....	5-7
5.4 Proposed Resolution to Initiate Recommendations.....	5-7

## Appendices

Appendix A – Stormwater Task Force Meeting Materials CD .....	A-1
