

Wake County Recycling & Disposal Facilities

All Wake County Convenience Centers are COMMINGLED RECYCLING SITES, which means you can place aluminum & steel cans, glass bottles & jars, mixed paper & plastic bottles in a single container. No more sorting! Recycling technology allows materials to be sorted at a Material Recovery Facility (MRF).

N North Wake Facilities

Wake County Solid Waste Management Division

The vision of the Wake County Solid Waste Management Division is to have a comprehensive, countywide solid waste management system that is flexible, sustainable, coordinated and built on a foundation of sound environmental principles. Wake County Solid Waste is achieving this vision by collaborating with every municipality within the County to develop and implement a single, comprehensive solid waste management plan that addresses all aspects of the countywide system.

In addition to working with municipalities, Wake County Solid Waste provides an array of solid waste services including Long Term Disposal planning, disposal and recycling facilities and operations, Feed the Bin Public School recycling program, environmental education, litter and illegal dumping enforcement, and Keep America Beautiful. These programs and services play a critical role in ensuring that the Wake County Board of Commissioners' Environmental Stewardship Agenda is achieved. The Environmental Stewardship Agenda is based on a desire to develop a culture that recognizes the community benefit of sound environmental protection through knowledgeable citizens. One part of that culture is to shift away from considering waste as a useless material and toward regarding it as a potentially valuable secondary material that is first minimized, then reused and recycled. Wake County is a key leader of this change by virtue of its role in managing environmental programs and services that touch the lives of Wake County citizens on a daily basis.

- In fiscal year 2005 Wake County Municipalities generated 350,642 tons of household waste, 28% of which was recycled.
- The Solid Waste Management Division manages 15 recycling and/or disposal facilities throughout Wake County.
- The Solid Waste Management Division is a public enterprise and does not operate on tax dollars—all programs are supported by landfill tipping fees, household fees and revenue generated from recyclables.
- The Solid Waste Management Division in partnership with the Wake County Public School System is implementing Feed the Bin, the school paper recycling program that will be phased in to all of the county's 147 public schools by 2007.

Special Programs

Electronics Recycling

Wake County residents can recycle electronic and computer equipment free of charge at the North Wake Multi-Material Recycling Facility, 9029 Deponie Drive in Raleigh, Monday through Saturday, 8AM until 4PM. **Electronics:** answering machines, microwave ovens, radios, stereos, telephones, TV's, VCR's, DVD and CD players. **Computer Equipment:** central processing units and mainframes; monitors and laptops; peripherals (keyboard, mouse, printer), toner and ink cartridges, parts (hard drives, modems, circuit boards), and uninterruptible power supplies. **Office Equipment:** cell phones and pagers, copiers, fax machines, and typewriters. For more information about this program visit www.wakegov.com/recycling.

Litter Line: 856-5700

If you see littering in progress, someone illegally dumping trash, or trash blowing out of an uncovered truck, call the Wake County Litter Line at 856-5700. Your call will be answered by the Wake County 911 Communication Call Center.

Trash Takers

Couldn't find what you are trying to get rid of? Go to Trash Takers to find organizations that recycle, reuse and dispose of just about anything! Visit Trash Takers on the web at www.wakegov.com/trashtakers.

Household Hazardous Waste

Hazardous waste and the environment just don't mix. You should not put household hazardous waste in the trash or pour paint or pesticides down the drain in your home. To aid residents in the proper and safe disposal of hazardous waste materials, Wake County Solid Waste Management operates Household Hazardous Waste Collection Centers twice a month. For more information visit www.wakegov.com/recycling.

First Saturday of the month

North Wake Household Hazardous Waste Collection
9037 Deponie Drive, Raleigh
8AM – 4PM

Third Saturday of the month

South Wake Household Hazardous Waste Collection
6000 Old Smithfield Road, Apex
7AM – 3PM

Annual Recycling Programs

Holiday Wrap-Up

Wake County residents can recycle extra holiday waste for two weeks after Christmas during the annual Holiday Wrap-Up program. Items such as wrapping paper, Christmas trees, gift boxes and greeting cards can be dropped off for recycling at selected Convenience Centers. The holiday season is a time for exploding consumption rates for all sorts of materials. Be an environmental steward during the holiday season by reducing consumption and taking advantage of a great opportunity to recycle your extra waste at any of the participating Convenience Centers. For dates and details about this program visit www.wakegov.com/recycling.

Telephone Book Recycling

Each year more and more telephone books are being distributed in Wake County. In an effort to reduce the number of books thrown away, Wake County encourages residents and businesses to recycle unwanted telephone books at various drop-off locations around the County. The program generally coincides with telephone book deliveries at the beginning of each year. During the 2005 program over 450 tons of telephone books were recycled! For dates and details about this program visit www.wakegov.com/recycling.

Examples of Toxics at Home

Aerosol sprays	Fuel	Poisons
Antifreeze	Glues	Polishes
Batteries	Mercury thermometers	Pool chemicals
Cleaners	Oil & filters	Propane tanks
Cooking oil	Paint	Solvents
Engine cleaners	Paint thinners	Weed killers
Fire extinguishers	Pesticides	Wood stains & finishes
Fluorescent lights	Photographic chemicals
