

Volunteer Program

Master Recyclers

Master Recyclers serves as a volunteer support system for the schools, students and staff of Wake County's FEED THE BIN school recycling program. FEED THE BIN is sponsored by the Solid Waste Management Division of Wake County, and the program funds provide paper recycling at each Wake County Public School System (WCPSS) school, and complimentary educational resources for teachers and students.

To become a Master Recyclers volunteer, you must complete an application and background check form. All applicants must be screened, in order to do work within schools. Once your application is received and processed, you may register for an orientation and training session. All volunteers will be trained to be self-sufficient and accomplished in their area of interest.
