

**Wake County, North Carolina
Stormwater Management Task Force**

Meeting #10 Voting Score Sheet

Priority Tool #1 - Inspection, Maintenance and Monitoring of Stormwater Infrastructure/Facilities

Decision #1

What type of approach should local governments pursue regarding maintenance of the stormwater drainage system?

(Circle one)

- a. Reactive to public complaints
- b. Maintenance based on routine inspections
- c. Pro-active, routine maintenance of system

Decision #2

What approach should local governments pursue regarding maintenance on NCDOT roads?

(Circle one)

- a. No maintenance on NCDOT roads (i.e. status quo)
- b. Perform necessary maintenance of stormwater infrastructure on NCDOT roads

Decision #3

What approach should local governments pursue regarding maintenance on private property?

(Circle one)

- a. No maintenance on private property (i.e. status quo...or only within public right-of-way)
- b. Cost share with private property owners on maintenance and repairs
- c. Provide maintenance of the private drainage system that conveys runoff from public property
- d. Provide maintenance on entire system (public and private)

Decision #4

What approach should local governments pursue regarding maintenance of stormwater BMPs required by ordinance?

(Circle one)

- a. Require maintenance agreement and annual reporting by property owner; inspect to verify
- b. Offer maintenance of BMPs by fee-for-service
- c. Solicit easements and assume maintenance on all BMPs

Decision #5a

Should local governments expand current water quality monitoring activities within the County?

(Circle one)

- a. yes
- b. no

Decision #5b

If yes to previous question, what would be the intended use of the expanded monitoring program?

(Circle one)

- a. In-stream baseline water quality
- b. Stormwater runoff quality/impacts
- c. Evaluation of stormwater BMP devices

**Wake County, North Carolina
Stormwater Management Task Force**

Meeting #10 Voting Score Sheet

Priority Tool #2 - Illicit Discharge Detection and Elimination (NPDES Phase II req.)

Decision #6a

What should be the "cutoff" within the storm drainage system for inspection and detection of illicit discharges?

(Circle one)

- a. Limit to only what's required by the NPDES permit (i.e. status quo)
- b. Expand program to include ALL outfalls to local streams

Decision #6b

Based on your knowledge of the IDDE requirements and the slides presented today, do you have any additional questions or suggestions regarding this program?

Decision #7a

Are malfunctioning septic systems an illicit discharge that should be addressed?

(Circle one)

- a. yes
- b. no

Decision #7b

If so, should the County evaluate options to address this issue?

(Circle one)

- a. yes
- b. no

**Wake County, North Carolina
Stormwater Management Task Force**

Meeting #10 Voting Score Sheet

Priority Tool #3 - Material Use, Exposure and Disposal for Municipal Operations (NPDES Phase II req.)

Decision #8

Based on your knowledge of the IDDE requirements and the slides presented today, do you have any additional questions or suggestions regarding this program?

Priority Tool #4 - Conserve Land Through Open Space Acquisition, Buffers, Etc.

Decision #9a

Do you support the dedication of additional resources for acquiring/conserving open space?

(Circle one)

- a. yes
- b. no

Decision #9b

Open space acquisition/conservation should be prioritized in the following locations?

(Circle any that apply)

- a. Water Supply Watersheds
- b. Areas of Impaired Waters (303d listed streams)
- c. Wake County Watershed Management Plan Priority Watersheds (2002)
- d. Regulated Floodplain areas
- e. Other (indicate below):
