## Wake County Solid Waste Management Division

Waste management practices directly affect the personal safety and health of citizens throughout Wake County. To be efficient and effective these practices must be coordinated among the 12 jurisdictions providing waste services.

The Solid Waste Management Division is collaborating with every municipality in Wake County to develop a comprehensive solid waste management plan that is sustainable, coordinated and built on a foundation of sound environmental principles.

In addition to working with the municipalities, the Solid Waste Management Division provides an array of services including disposal and recycling facilities and operations, litter and illegal dumping enforcement, and waste reduction assistance to the commercial sector.

For more information about Wake County's Solid Waste Management programs and services, visit us online at [www.wakegov.com/recycling](http://www.wakegov.com/recycling) or call 919.856.8168.
