

Citizens' Facilities Advisory Committee

MEMORANDUM

TO: Citizens' Facilities Advisory Committee Members

FROM: Nicole Kreiser

DATE: October 20, 2006

RE: Follow-Up to Questions Raised during September 26 CFAC Meeting

As highlighted in the September 26 Citizens' Facilities Advisory Committee Meeting Notes, committee members asked for several pieces of information to be brought back to the committee. Attached are the following items:

- Presentation: 20 Year Approach to Existing Schools (Life Cycle Replacements, Major Renovations, Deferred Major Renovations and Life Cycle Replacements)
- Whitestone Report – Service Life Study
- Indoor Air Quality Information and Cost Impact
- Gates Foundation and School Redesign
- Multi-Story Schools Built in Past Five Years
- Land Banking in School Bond
- Projected and Actual WCPSS Student Enrollment

Please note, that WCPSS staff have stated that questions related to parking and looping of buses are parking and ordinance driven and will require a more robust discussion of the issues involved. WCPSS staff has indicated that they will produce a more thorough response about site parking, bus parking, and high school transportation issues, but the response may need to involve municipal planners.

If you have further questions, please feel free to let me know.
