

Preliminary Report on Suitability for On-Site Wastewater System Requirements

- The report must be prepared, stamped, and sealed by a North Carolina Licensed Soil Scientist.
- The report must include the following:
 - Date of soils evaluation
 - Method of evaluation
 - General description of soil parent material
 - Representative soil descriptions of each major soil unit (including site and soil characteristics defined in Regulations Governing Sewage Treatment and Disposal in Wake County, with suitability rating and proposed long-term acceptance rates for wastewater disposal
 - Proposed land use and size
 - Site plan that :
 - clearly delineates and labels soil suitability units
 - notes the method by which soil boundaries were generated (e.g., field location and surveying, plotting from GPS location)
 - lists area (sq. ft.) of each soil suitability unit within the site
 - designates any off-site wastewater disposal easements and access to these areas (if noncontiguous to the site)
 - includes a legend describing suitability for on-site wastewater disposal systems
