

Is PrEP for you?

What is PrEP?

- PrEP is pre-exposure prophylaxis. It is a daily medicine called Truvada® that reduces your chance of getting HIV.
- PrEP can stop HIV from taking hold and spreading through your body.
- Taking PrEP every day reduces the risk of getting HIV from sex by more than 90%. It reduces the risk of getting HIV among people who inject drugs by more than 70%.
- You should use condoms with PrEP to reduce the chances of getting HIV from sex even more.

Is PrEP Right for You?

PrEP may help you if you are 18 years old or more, are HIV –negative and **ANY** of the following apply to you:

You are a gay/bisexual man and

- Have an HIV-positive partner
- Have more than one partner, a partner who has more than one partner, or a partner whose HIV status is unknown and you also
 - Have anal sex without a condom, or
 - Recently had a sexually transmitted disease (STD)

Are a heterosexual and

- Have an HIV-positive partner
- Have more than one partner, a partner who has more than one partner or a partner whose HIV status is unknown and you also
 - Don't always use a condom for sex with people who inject drugs or
 - Don't always use a condom for sex with bisexual men

You inject drugs and

- Share needles or equipment to inject drugs
- Recently went to a drug treatment program
- Are at risk for getting HIV from sex
