

Dragonfly Craft Instructions

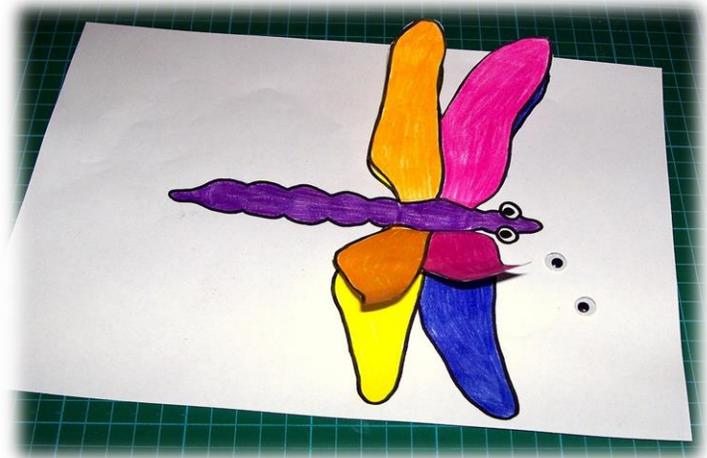

1. Print off the templates for the dragonfly and its wings. If possible, print the wings template onto thick paper like cardstock, to give them more strength.

2. Color in the dragonfly and the spare wings with bright colors and/or patterns of your choice.

3. Using scissors, cut out the spare pair of dragonfly wings.

4. Using glue or double-sided tape, attach the spare wings to the dragonfly, as shown here.

5. Embellish the dragonfly with sequins, jewels, glitter glue, googly eyes, and/or anything else that you choose!

BUT don't put too many decorations on the top pair of wings, as they may become too heavy to stand up off the paper.
