

National Testing Lab

Status	Contaminant	Results	Units	National Standards	Min. Detection Level	
Inorganic Analytes - Metals						
+	Uranium	0.077	mg/L	0.030	EPA Primary	0.001
+	Gross Alpha	59.0	pCi/L	15	EPA Primary	3.0
●	Gross Beta	25.1	pCi/L	--		4.0
●	Radon	7509	pCi/L	--		100

Units matter

Compare apples to apples

Contaminant – This is what your water was tested for.

Results – The amount of contaminant found in your water.

Units – Be sure to notice the units and compare to numbers that use the same units (think inches vs. feet).

Standards – The limits or thresholds set by an agency.

- The threshold for Gross Beta is different.
- There is no threshold for radon, just recommendations.
