

WAKE COUNTY WATER PARTNERSHIP

Established in 2016 by the Wake County Board of Commissioners, the Wake County Water Partnership provides collaboration, leadership and expertise in local water-related issues.

Partnership members include representatives from municipalities, academia, advocacy groups and private water providers, as well as residential development groups and members of the public.

WATER PARTNERSHIP SUBCOMMITTEES

EDUCATION AND OUTREACH

Explores ways to educate the community about water resources and conservation. Develops partnerships with municipalities and partner agencies to carry out educational efforts.

COMPREHENSIVE PLANNING

Coordinates water management for all water sources within the community. Focuses on long-term management, drought planning and water conservation, and incorporates new technology where appropriate.

COORDINATION

Ensures all water partnership members and agencies are aware of ongoing and new approaches to water management within the community.

GREEN INFRASTRUCTURE

Explores opportunities for the development of infrastructure that protects local water resources, while enhancing neighborhoods, parks, schools and other areas in the county.
